DRAFT-DAY CHEAT SHEET · SEASON 2027

STARTUP DRAFT

41 ROUNDS · SLOW SNAKE · 12 FRANCHISES

HOW IT WORKS

- 41 rounds, slow snake, with a 2-hour pick clock. Major leaguers and prospects go in the same draft.
- The clock pauses every night from midnight to 8:00 AM ET. You can still pick; the timer just stops.
- Draft order comes from a random draw, posted in Discord before the draft.
- Set a queue. After two expired clocks the Commissioner may switch on auto-draft until you're back.
- Your dues must be paid by the deadline to draft.
- Finish with a legal roster by the roster-compliance deadline.

WHAT DRIVES VALUE

- A single nets 4.6, a double 7.6, a triple 10.3, a homer 14.
- A walk is two-thirds of a single. Steals pay if you're safe 2 in 3.
- A typical start scores about 20. 7 IP, 4 H, 10 K, 1 BB: +48.5.
- Saves +6, holds +4. Relievers matter; aces matter more.
- Only 7 pitcher starts count a week.

No runs, RBI, wins, earned runs, quality starts or blown saves.

PICKS AND TRADES

Trade freely, no vetoes. To trade away a future 1st or 2nd, your dues must be paid through that pick's season first, or the trade is reversed. No conditional picks.

THE ANNUAL DRAFT AFTER THIS

From 2028, each January or February: 5 rounds, linear, an 8-hour clock, minors-eligible players only. Non-playoff teams pick first, by lowest Potential Points.
